MG

Hi Dr. Witulski,

I thought the process was really straight forward which was helpful for me as a TA. You gave me sufficient notice and sufficient time to grade projects. I liked having somewhat of a timeline for the semester as far as grading goes. I was able to somewhat plan out my schedule around it.

I spent the last few days thinking about this and I can't really think of "what should be changed for future iterations." The only thing I can really think of is: grading 140 research based essays can become a bit tedious for the grader and it may impact the effectiveness of the grader to have the same focus and attention span for each student's paper. However, this is not an issue with this class, but more so with the nature of large classes at a university. I am not sure what a solution can be seeing that I think essays are important to assign to students but I thought it was worth mentioning in the event a solution may arise.

Thank you for such a wonderful time. I thoroughly enjoyed working with you.

Best wishes,

Mia

Not a problem, Mia. The last thing is one I mentioned before. I would appreciate it if you sent me some thoughts on being the TA of the course. What you did, what worked well, what should be changed for future iterations, that kind of thing. Nothing big and nothing formal, it's just for me. And no rush.

Thanks for all of your great work this year and enjoy your summer!

Hi Dr. Witulski,

I just wanted to let you know that I saw that you graded the extra credit already and everything seems to have been completed. Is there anything else you need me to assist with?

Mia
